

VIRTUAL LEARNING CIRCLE

EIFL-PLIP's 'bite-sized' training video series for public librarians

watch · learn · apply

What is microlearning?

Microlearning breaks training into short, focused lessons – each built around a single practical skill or outcome- so learners grasp it quickly and put it to use right away.

"Small chunks – one outcome at a time."

1 Bite-sized

Short presentation-based videos, roughly 5-11 minutes each.

2 Complete

A quick but whole lesson you can act on immediately.

3 Flexible

Self-paced with less overload and more practical outcomes.

Meet the EIFL-PLIP Small Bites series

Short training videos from the EIFL Public Library Innovation Programme (EIFL-PLIP), made for public librarians for self-paced learning or as ready-made material for librarians' training.

- Based on public librarians' capacity-building experience by EIFL-PLIP
- Most include real examples from grantee-library projects.
- *Presented by Susan Schnuer, Ugne Lipeikaite, and Ramune Petuchovaite.*
